EDUCATION

**Bachelor of Technology
Information Technology**
SIMATS Engineering, Chennai
2024 – 2028
CGPA: 8.5
12th Grade: 74% | 10th Grade: 82%

SKILLS

Programming Languages:
Java, Python, JavaScript

Frontend:
React.js, HTML5, CSS3, Tailwind CSS

Backend:
Node.js, Express.js, REST API Development

Database:
MongoDB, Mongoose

Real-Time & AI:
WebSockets (Socket.io), MediaPipe, face-api.js

Tools:
Git, GitHub, Vercel, Railway, VS Code

Concepts:
Full Stack Development, API Design, Web Application Development

CERTIFICATIONS

- Python – Kaggle (2026)
- AWS – Intellipaat (2026)
- JavaScript Essentials – Cisco (2026)
- Java – HackerRank (2026)

ACHIEVEMENTS

- Participated in 2 hackathons focused on real-world problem solving.
- Programmed and deployed 2 comprehensive AI-based full-stack applications.

LANGUAGES

Tamil, English

PROFESSIONAL SUMMARY

Full Stack Developer with a strong interest in AI-driven applications and real-time systems. Experienced in architecting and building scalable web applications using React.js, Node.js, and MongoDB. Skilled in REST API creation, real-time systems using WebSockets, and integrating computer vision tools such as MediaPipe and face-api.js. Strong foundation in Java, with working knowledge of Python and JavaScript. Passionate about building efficient, real-world software solutions.

PROFESSIONAL EXPERIENCE

Krythion – Gamified AI Learning Platform

- Full Stack Developer | 2024 – Present
- Engineered a scalable full-stack web application utilizing React.js, Node.js, and MongoDB, supporting concurrent user sessions.
 - Established real-time communication across the platform using WebSockets (Socket.io), reducing data latency.
 - Formulated and integrated an AI Tutor module to provide interactive learning support, increasing overall user engagement.
 - Applied face detection algorithms (face-api.js) to accurately monitor user engagement, achieving high accuracy in real-world testing.
 - Built gamification features, including leaderboards, rewards, and achievements, to drive increase in daily user retention.

MindMeter – Cognitive Wellness System

- Full Stack Developer | 2024 – Present
- Created a system to monitor cognitive fatigue using comprehensive activity tracking, successfully analyzing data points per session.
 - Constructed a Python-based tracking system to analyze user behavior patterns effectively, reducing manual monitoring time.
 - Executed blink detection utilizing MediaPipe for precise fatigue analysis, achieving a high successful detection rate.
 - Crafted a real-time dashboard featuring continuous, live data updates with sub-millisecond latency.
 - Instituted an automated alert system for rapid high fatigue detection, improving emergency response times.
